1. Open the System Preferences

2. Open the Network Settings
3. At the bottom on the left, click on the + button. You will see a drop-down menu, and select VPN.

4. From another drop-down menu, you can select the L2TP VPN type and click on the Create button.
5. Fill up the server address field with **vpn.uni-corvinus.hu**

6. Open the Authentication settings and fill up the Shared Secret field with **Corvinus**.
7. After you applied the settings, click on the Connect and type your user name and password in the correct fields.

8. If you can successfully connected, you will see something like the picture below.
