Research, professional activity

Major taught courses or fields of education:

Introduction to health economics
Health policy and finance
Business economics
Microeconomics
I. Introduction to Health Sciences
Value based purchasing of health care services

Field of science and discipline:

Colleague CV: Baji Petra

economics

Current fields of research:

Health economics
The role of risk perception in health related decisions
Willingness to pay and informal payments for health care services
Health economic evaluation of innovative technologies
Disease burden and quality of life studies
Access and preferences to biological therapy in IBD
Financing long-term care

Previous fields of research:

Priority settings in health care
Corruption in health care

Major research projects

- 2009 - 2013, ASSPRO CEE 2007
Form of participation: member of the research team
Moneylender: European Commission
Further info about research: ASSPRO CEE 2007 is a collaborative research project co-funded by the European Commission and focussed on the assessment of patient payment policies, specifically those in Central and Eastern Europe. This website provides details about project partners, objectives and activities, as well as an overview of current project results. On a long-run, the project is expected to provide scientific evidence for informed discussions on patient payments between policy-makers, insurers, researchers, health care providers and consumers. PhD thesis: "Out-of-pocket patient payments for health care services in Hungary: Past experience and future perspectives" Supervisors: Prof. Dr. Wim Groot, Co-supervisors: Dr. Milena Pavlova, Prof. Dr. László Gulácsi
- 2013 - 2013,
Form of participation: member of the research team
Moneylender:
Further info about research:
- 2009 - , Disease burden and quality of life studies
Form of participation: member of the research team
Moneylender:
Further info about research:
- 2009 - , Health economic evaluations
Form of participation: member of the research team
Moneylender: 0
Further info about research: Diseases: Crohn's Disease, Colitis Ulcerosa, Rheumatoid Arthritis, Arthritis Psoriatica, Ankylosing Spondylitis, Psoriasis
- 2013 - ,
Form of participation: member of the research team
Moneylender: 0
Further info about research: The project aims to analyze the preferences of health policy makers in priority setting. To that end, a survey has been developed to be distributed to healthcare managers, policy-makers of various levels (to specify in the survey) working at regional or national ministries, directorates etc., professionals or within the pharmaceutical or other industries. This research project and survey has already been launched in over 10 countries such as Norway, Austria, Spain, Nepal etc. Coordinators: Francesco Paolucci, Australia National University and University of Northumbria Newcastle Manuel García-Goñi, Universidad Complutense de Madrid

Colleague CV: Baji Petra

- 2014 - , The effect of risk perception on health related decisions
Form of participation: leader of the research team
Moneylender: Hungarian Scientific Research Fund
Further info about research: In theories related to health behavior risk perception of individuals play a central role. Empirical studies confirm that risk perception influences the decisions on prevention, the engagement in different treatments, as well as the willingness to pay for health care services. Previous studies suggests that subjective risk perception (i.e. how dread is the disease) might influence decisions related to health behavior more than information on the likelihood of the events. Subjective perception of risk involves several social and psychological dimensions, which appear to be an under-studied. The project aims to explore the dimensions of risk perception related to health problems and diseases (i.e. what makes a disease “dread”) and the effect of individuals’ risk perception on decisions related to health behavior (e.g. engagement in preventive actions and treatments), the willingness to pay for health care services and health insurance.
- 2018 - 2022, Healthcare Performance Intelligence Professionals (HealthPros) - Marie Skłodowska-Curie Innovative Training Networks (MSCA-ITN- ETN), Call: H2020-MSCA- ITN-2017, Project ID 765141
Form of participation: member of the research team
Moneylender: European Commission
Further info about research:
- 2016 - , Innovative Financing Mechanisms for Sustainable Long-Term Care in Europe
Form of participation: member of the research team
Moneylender: Axa Research Fund
Further info about research:

Membership in scientific or professional bodies/organizations

- 2013 - , ,
Hungarian Association of Actuaries, national
- 2014 - , , member
Hungarian Economic Association, national
