

Connecting to Cornet EAP WiFi network under Android 7.0 phone

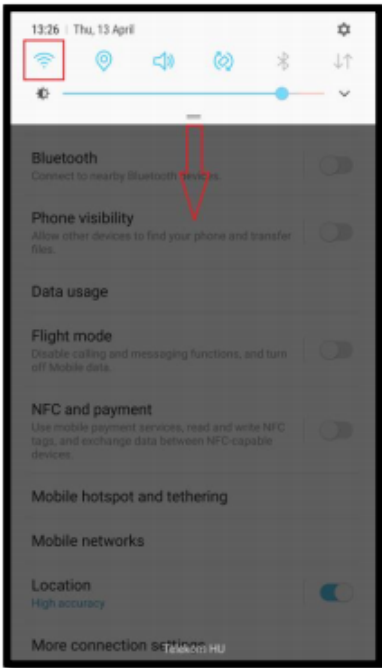

It is required that the device is WiFi enabled.

1. In the settings choose the '**Connections**' menu item.

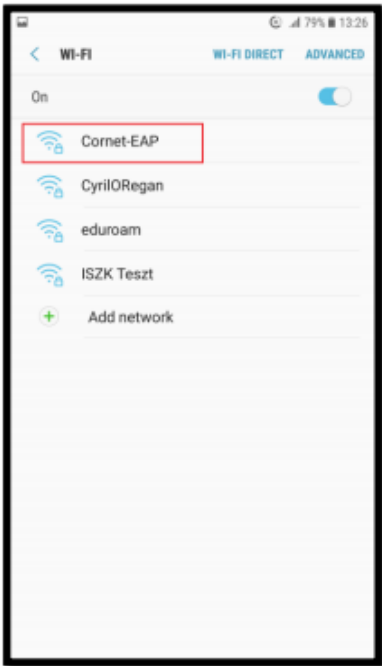

2. Turn on the phone's built-in Wi-Fi device.

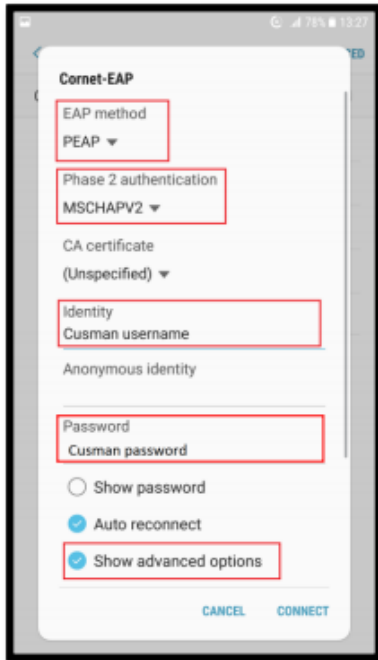

3. In the drop-down menu hold the WiFi button, until the available networks appear.

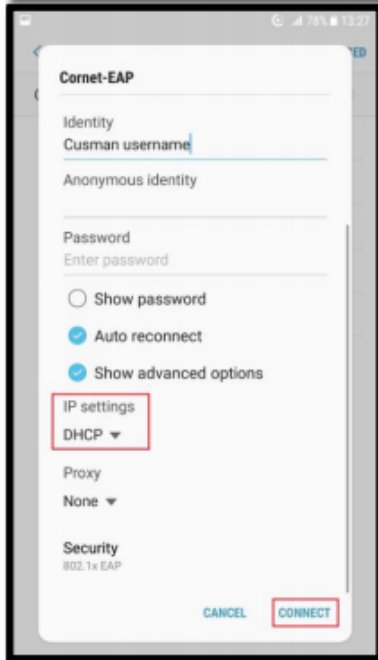

4. Choose the 'Cornet-EAP' network.

5. In the new screen choose the following options:

- EAP method: **PEAP**
- Phase 2 authentication: **MSCHAPV2**
- Identity: **Cusman username**
- Password: **Cusman password**

Following this, check the '**Show advanced option**' menu item and scroll down.

6. Make sure, that IP settings is set to DHCP

Now you can connect to the network.
